Islands

Islands are fascinating. For many people, they fulfil the idea of a life in paradise: happy and carefree in harmony with unspoilt nature. In reality, the islands of this world are habitats with a social structure sufficiently close-knit to be taken in fairly quickly, and in most cases of uniform culture.

Each episode in this series will present one island as a cultural entity in its own right. Particular attention will be devoted to the lives of the modern islanders and the natural beauty of the environment.
