The World of Ice

Ice is not just a climatic phenomenon, it also plays a role in legend, standing for an ancient fear of mankind – and yet people like the Eskimos have been living in the ice for thousands of years. Adventurers have always seen the eternal ice as a challenge. Artificially generated cold has also influenced our lives more than many other technical innovations. One only has to think of air-conditioning and deep-frozen food. Our series comprises entertaining reports with one thing in common: ice, artificial or natural.

- 01 The Ice Hotel in Northern Sweden**
The world's biggest igloo
