Future Now – Innovations Shaping Tomorrow

What will our lives be like in the future? How will we get from A to B? Will we be able to successfully defeat incurable diseases? Researchers across the world are busy trying to find answers to burning questions such as these, and focusing on the key fields of communication, the environment, mobility and health. In the series **Future Now**, we observe them as they go about their work and present 20 visionary scientific projects. The series aims to explain and enlighten in a comprehensible and entertaining way. Here are the topics:

Environment

- 01 Drought Resistant Crops
- 02 Water and Waste in Megacities
- 03 Cleaning Up CO2
- 04 Brave New Creation – Scientists Who Create Life
- 05 Studying Bats in Ghana

Communication

- 06 Organic LEDs
- 07 Data at the Speed of Light
- 08 Predicting Earthquakes
- 09 Faster, Smarter, Everywhere – The Computer of the Future

Mobility

- 10 My Dear Robot
- 11 The Deep Sea Search for Methane Hydrates
- 12 From Hairy Feet to High Tech
- 13 How the Elderly Can Stay Mobile
- 14 The Multi-Faceted Car of the Future
- 15 Aerospace: the Universe as an Energy Source?

Health

- 16 Arsenic in Drinking Water
- 17 Looking Alzheimer's in the Eye
- 18 Brain Research – Do Neurochips Improve Brain Quality?
- 19 Stem Cell Versatility
- 20 Amazing Artificial Skin
