## Dimension X

Fantastic voyage into reality – you need special equipment if you want to experience the fantastic dimensions of our world. The microscope is our spaceship through the universe of the minute; the endoscope is our ferry through the channels of the human body; slow motion and time-lapse film photography enable us to journey through time. A fantastic voyages like these guarantee the joy and adventure of discovery. They generate wonder; they arouse respect for the fantasy of nature. We see for the first time the tiny predatory insects that protect our food and our crops.
