## TransTel Agriculture

The series **TransTel Agriculture** is intended primarily for farmers, farm workers and young people, especially those training to become farmers. The series was made in collaboration with Jordan TV, Thai TV and Voice of Kenya, and deals in a readily understandable way with the basic issues of agriculture. The individual films begin and end with animated cartoon sketches dealing with the theme of the particular episode. The main body of the film goes into the subject in question in an easily comprehensible fashion. The series is suitable for showing in all climatic zones.
