## Know it!

**Know it!** is DW Transtel's magazine all about knowledge.

Do you know what factors influence climate change or what impact it has on humanity? Are you aware of the questions currently being researched by scientists? How much do you know about energy and the environment? Do you keep up-to-date with the latest developments in transport technology? Do you keep track of health and medical advances? And did you know...

All over the world, scientists are working to increase our knowledge. Engineers develop practical applications for new discoveries; their research makes it possible for people to embrace the future. Those equipped with greater knowledge have a better chance of solving problems, improving living conditions and curing diseases, and, ultimately, of securing the survival of humanity as a whole.

**Know it!** brings you magazine-length reports packed full of information on science, technology and everyday phenomena. **Know it!** lets you in on the latest developments and discoveries from all over the world. If you're curious about the world around you, just tune in and **Know it!**

### SAMPLE EPISODE 30 MINUTE VERSION **HD**

#### Fingerprint Breakthrough

For over a century now, fingerprints have been a powerful tool for identifying perpetrators. Now a new scanner can read them without touching or altering the underlying object.

#### The Perfect Mattress

If you don't sleep well, it can wreck your day. Researchers have discovered that individually tailored mattresses can have a positive impact on sleep patterns.

#### Window to the Future

Office buildings with glass facades need climate control systems to keep them cool inside during the summer and warm in the winter. A high-tech window could make that a thing of the past – and generate electricity at the same time.

#### Making Robots More Human

In the future, humanoid robots will be our servants – possibly even friends or companions. But there are still many complex hurdles that have to be overcome before that can happen.

#### Lego E-cars

In terms of performance, electric vehicles are expensive compared to combustion engine alternatives. Now a new modular system could make building them a much cheaper prospect.

#### High-Altitude Health

Doctors noticed long ago that people who live in cities are more likely to contract hay fever than those in the country. Is there a connection between allergies and environmental toxins?

#### Before Birth

Developmental researchers have found that a fetus is influenced dramatically by the world long before birth. The season in which you're born even has an impact on life expectancy.
