---

**Important technical remark:** The diameters of the antennas are calculated for perfect weather conditions (clear sky), assuming perfectly aligned high quality antennas. Commonly used wire mesh antennas have a lower efficiency than solid dishes. To secure the reception, it is advisable to generally choose a diameter about 20% larger.

All information may be subject to change. As of March 2022 | dw.com/programguide

---

Reception may be possible even beyond these contours

**0.8m**

Diameter of satellite receiving antenna in meter (approximate values) for Direct-to-Home
