Embattled in Iran

Diary From a Warzone

864983

Documentary

01 x 30 min.,

2026, HD;

Arabic, English,

Spanish

WW, VoD, M, IFE

Amid the war in Iran, two men secretly film their day-to-day lives. These smuggled recordings reveal the struggle they face between internal repression and external attacks. This film features never-before-seen footage of daily life in Iran during US-Israeli bombardments – and provides insight while the Iranian regime continues to suppress the country's media.

Exploring the environmental challenges we face and the people seeking solutions around the world.

The Forest and the Climate*

Trees are the foundations of life. Yet we are destroying vast swathes of forest. It's time for a radical rethink.

Bringing Tropical Forests Back to Life*

After years of overexploiting its natural resources, Costa Rica has managed to restore its diverse tropical rainforests.

Is the Bioeconomy a Solution to the Climate Crisis?*

Is a fossil-fuel-free economy based on renewable biological resources the solution to the climate crisis?

Saving Europe's Nature

On one of the most densely populated continents, people are searching for ways to live with nature, not just off it.

We travel to spectacular habitats to show the extraordinary lives of wild animals and their constant bid to survive and thrive.

African Rock Pythons – Silent, Deadly Hunters

African rock pythons are extremely large, prehistoric constrictor snakes. They are silent, deadly super-predators.

Cuttlefish – Master of Camouflage

Cuttlefish are masters of camouflage. They can alter their skin color and pattern in an instant.

Honey Badgers – Fearless Survivalists

Honey badgers are fearless, feisty, and tough. They're always hungry and will eat pretty much anything they encounter.

Examining the connection between the global economy and natural resources: the conflicts, crises and possible solutions.

Race for the Seabed

The sea harbors vast amounts of manganese nodules, sulfides, and metal crusts – a potential new source of raw materials.

The Race for Africa's Raw Materials

New technologies require huge amounts of raw materials. This puts Africa at the center of geopolitical interests.

Salt – The Underappreciated Resource

Salt is not only a product of Earth's history, but also a raw material of growing economic importance.

Whom Does Water Belong to?

Water is the foundation of all life, while also being one of the world's most heavily used resources.

The Myth of Clean Natural Gas

Natural gas extraction produces far more harmful methane than previously thought. Why, and what can be done about it?
