

Made for minds.

GSAT 17

TV Program – DW English HD

Rebroadcasting and Direct-to-Home

Position	93.5° East
Transponder	C 10
Frequency	4091 MHz
Polarization	vertical
FEC	5/6
Symbolrate	10000 KSymbols/s
Modulation	8PSK / DVB-S2
Video Standard	1920x1080/50 i
Video Compression	MPEG-4 (h. 264)
Audio Compression	MPEG-1 / Layer 2
Encryption	-
Additional Data Services	EIT / EPG
TV Channel	DW English HD

Reception may be possible even beyond these contours

Number of contour	38	40	42
Diameter of satellite receiving antenna in meter (approximate values)	1.8	1.5	1.2

Important technical remark: The diameters of the antennas are calculated for perfect weather conditions (clear sky), assuming perfectly aligned high quality antennas. Commonly used wire mesh antennas have a lower efficiency than solid dishes. To secure the reception, it is advisable to generally choose a diameter about 20% larger.
